"LIFE EXTENSION"

The week of October 7 to 13 has been designated as "FIRE PREVENTION WEEK." Again we are reminded of the "FIFTH HORSEMAN" -- FIRE. Losses, in deaths, injuries, and national wealth continue to rise despite our efforts. This indicates much greater effort, care and vigilance are required on the part of each one of us every day.

Here at the "LAB" our fire record is good; however, it can be improved. In retrospect, of six fire calls of a total of sixty four during the current year, two were the result of careless smokers while four resulted from escaping propane gas caused by human, rather than mechanical, failure. Fortunately damage in each instance was negligible, but obviously the gas leaks may have caused disasters which could have been prevented.

Therefore, let us be mindful that -- "DAILY FIRE PREVENTION is LIFE EXTENSION."
